

The PILLARS software design partner LOAD developed the PILLARS App to help all learners understand impact management in organisations. Built on the PILLARS competence framework, the App supports practical learning across sectors. In particular, it helps impact managers set goals, assign KPIs, track progress and gather evidence for reporting. Watch a short video demonstrating its features here:

Coming soon

The PILLARS App is **available for validation and exploitation** across teaching, training, professional development and research. It is openly accessible and aligned with EU priorities on transparency, comparability and mobility under Erasmus+ funding. **Contact** the project coordinator via the PILLARS website to **join** as a **validation partner**.
